

Train the Trainer

This section provides an introduction for facilitators and gives a philosophical background for the program. It also covers workshop preparation, facilitation tips and some more advanced instructions on how to set-up the computers to run the workshops.

To get the most out of this section its best to have gone through the Train the Trainer series at least once with a SLQ facilitator or other organisation that has run the program before. To see when the next CCC-SLQ workshop is being run please contact us.

Remember that these workshops work best when adapted to suite **your** participants. You can change the order, skip sections or spend time concentrating on one section that is particularly relevant. The core focus is on building self-sufficiency and knowledge.
